FOR IMMEDIATE RELEASE September 1, 2020

Contact: Iron County Health Department (ICHHD)

Katie Hampston, Health Officer or Zona Wick, Public Information Officer 715-561-2191

Hurley, WI- Iron County Public Health is reporting **126** positive COVID Iron County residents, **104** are recovered, **5** ever hospitalized, **1355** negative test results and **1** death.

If a person tested positive for COVID-19 was out in public during their potential time of communicability and if the time spent there could have resulted in an exposure for others, then the health department lists this event or business to alert the public. **This is not intended to lay blame on any local businesses, and this does not mean that the business must close.**

It is important for everyone to continue to be diligent as people without symptoms can spread the virus and may be visiting the same places as you are. Public Health can confirm that there were positive cases identified at the following establishments:

- Around the Corner Pub August 27th “evening”
- Antlers Pub August 26th and 27th “evening”

If you have been at these establishments during the time listed, monitor your symptoms. If you develop symptoms isolate yourself and call your physician.

The health department works cooperatively with businesses when listed as an exposure site. There is consideration for those working essential jobs in government and health care, at grocery stores, community utilities, and in other vital workplaces, who staying safer at home during the COVID-19 pandemic isn't an option. We understand balancing the obligations as an employee with the natural concerns one may feel for your own health, financial well-being, and the safety of loved ones isn't easy. The health department offers businesses a toolkit to assist during these times.
